The Caribbean Drum Circle program introduces participants to the innovative design, development, and cultural significance of the steel drum. The Feel Breathe Move program uses drumming, rhythm, and relating to teach how to get out of stress and into relaxation. Both programs utilize call and response, singing rhythms, and playing percussion instruments. All will enjoy this fun and educational experience!

...all of the following systems are engaged when practicing music: the sensory and perceptual systems (auditory, visual, tactile, kinesthetic), the cognitive system (symbolic, linguistic, reading), planning movements (fine and gross muscle action and coordination), feedback and evaluation of actions, the motivational/hedonic (pleasure) system, and learning memory.

*~ Professor Weinberger, founding member of the Center
for the Neurobiology of Learning and Memory (1998)*

- Promotes Social Development, Confidence, and Self-worth
- Facilitates Learning on a Deeper Level through Involvement
- Enhancing Curriculum to Higher Order Thinking
- Improves Spatial, Logical, and Mathematical Reasoning
- Utilizes Multi-sensory Learning and Teaching Approach
- Engages Interpersonal & Intrapersonal Communication
- Enhances Communication Skills
- ...Music Does Much More!
